We believe materials matter

We create clothing that's not only a responsible choice but also becomes an essential part of your journey, passions, and discovery of the world. Born out of a love for natural fabrics and the joy of wearing them, FLOV is a brand that brings nature closer to your skin. Our garments are made primarily from bamboo – a material that's not only incredibly soft and comfortable to wear, but also environmentally friendly. We want every item to express care – for nature, for people, and for the quality of life. That's why our production is based on responsible decisions and fair working conditions.

FLOV is not just about sustainability and comfort – we also care deeply about style. We design clothes that are both fashionable and timeless, reflecting a life in harmony with nature and your personal flow. Our products are meant to express your freedom and connection with the world around you.

The Flov Team

FLOV

A woman with long, wavy brown hair is shown from the chest up, wearing a light teal t-shirt. She is making a peace sign with her right hand, which is raised above her head. She has a playful, slightly pouting expression. The background is a warm, orange-toned wall on the left and some dry, leafy branches on the right.

Feel the Flov

FEEL THE
FLOV

A woman with long, wavy brown hair is shown from the waist up, wearing the same light teal t-shirt. She is smiling at the camera. The background is a dark, heavily textured wooden door with many metal studs or bolts arranged in a grid pattern.

Natural textile revolution

Bamboo is a remarkable resource that combines luxurious softness with functionality. Its natural properties make our clothes:

Breathable and airy

– perfect for any weather

Hypoallergenic

– gentle even on the most sensitive skin

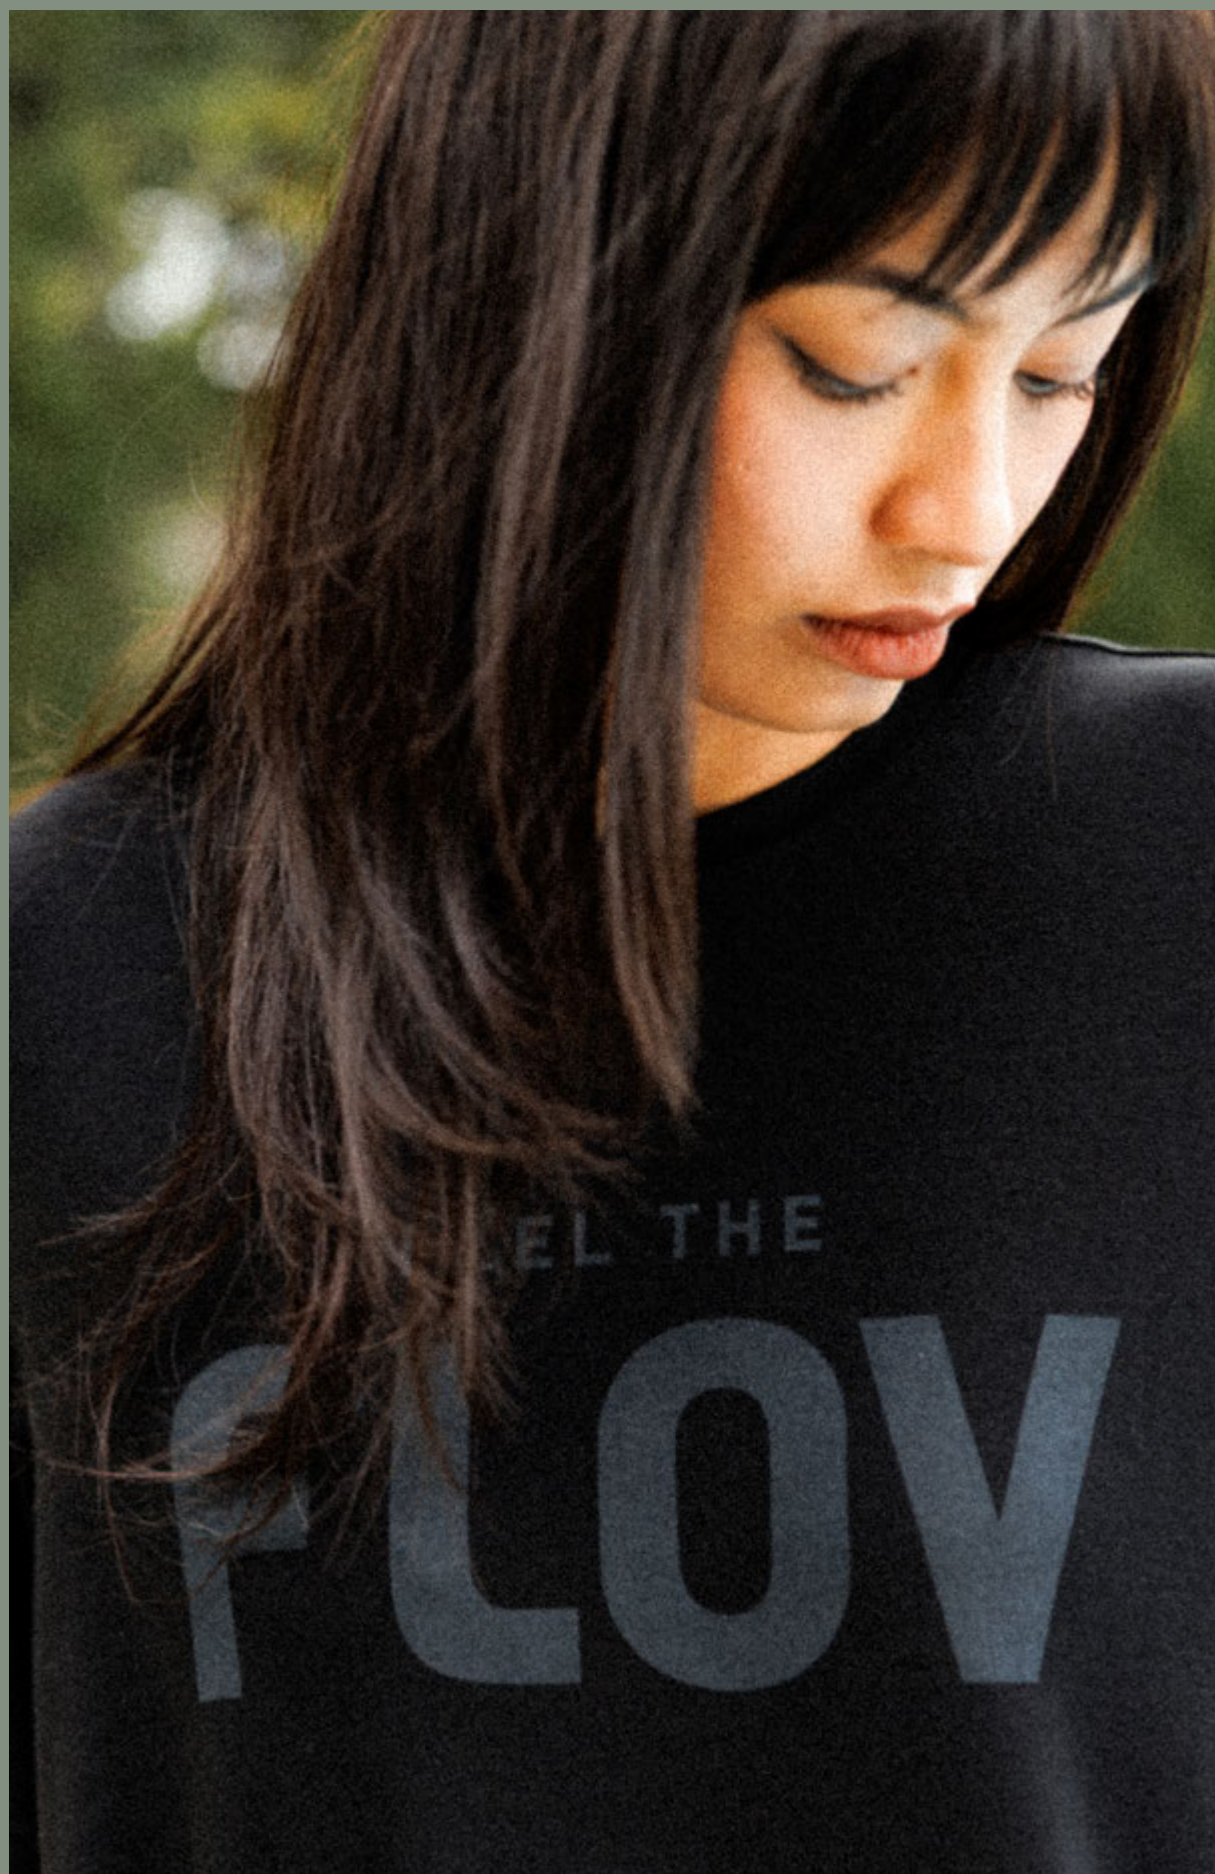

Antibacterial and antifungal

– keeping you feeling fresh

Eco-friendly

– bamboo grows quickly without the need for pesticides or intensive irrigation

Bamboo in the production process

Sourcing

Our bamboo is grown on regenerative farmland, which is FSC (Forest Stewardship Council) certified. The characteristics of bamboo allow it to be grown with minimal water consumption and without the need to use fertilizers or pesticides.

Harvesting

Bamboo can grow up to a meter a day. To prevent bamboo growth and to reduce the risk of soil erosion, only the top of the bamboo is cut.

Processing

Our closed-loop process uses bamboo's soft core and a natural solvent, ensuring no harmful substances are released and protecting the environment.

Spinning

Bamboo viscose can be formed into an ultra-fine yarn and blended with other materials to create custom fabrics.

Responsible production

Not just the material but the way it's processed matters.

We partner with factories that hold certifications guaranteeing the highest environmental and ethical standards:

FSC
(Forest Stewardship Council)
- certifies responsible forestry practices.

Ecocert Organic Standard
- promotes responsible organic production.

Oeko-Tex Standard 100
- ensures our fabrics are free from harmful substances.

Organic Content Standard (OCS)
- verifies the use of organic raw materials.

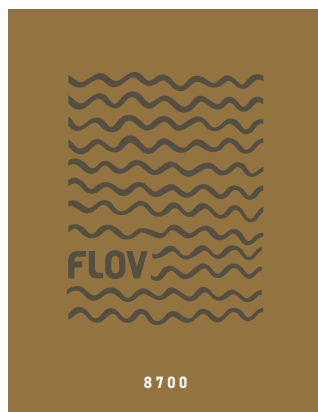

Organic Agriculture Europe
- supports sustainable agriculture and collaboration.
